CHAARGOLD
Crafting Carbon Perfection

PYROLYSIS-MADE | IN-HOUSE

Premium biomass carbon

PRODUCT BROCHURE 2026

CHAARGOLD

Charcoal Briquettes

Uniform. Clean-burning. Long-lasting. Manufactured end to end in our own pyrolysis retort units, from raw biomass to finished briquette, for BBQ, grilling, premium hospitality and industrial heat.

HEXAGONAL
High heat | Long burn

PILLOW
Quick light | Steady heat

HONEYCOMB
Max airflow | Efficient

SYNOPSIS

What are charcoal briquettes?

Charcoal briquettes are engineered fuel blocks made from carbonised biomass. Wood and agricultural residues are converted to charcoal by pyrolysis (heating in a low-oxygen environment), then milled, blended with a binder and compressed into blocks of precise shape, size and density.

Unlike irregular lump charcoal, briquettes deliver the same quality in every piece: predictable ignition, a stable burn and consistent heat, with far less smoke, sparking and residue. A cleaner, more efficient and more controllable fuel for everything from a family grill to an industrial furnace.

70-79%
Fixed carbon

6,800-7,800
GCV, kcal/kg

60-240+ min
Burn duration

500-700°C
Peak temperature

MADE IN-HOUSE

From biomass to briquette, under one roof.

Every CHAARGOLD briquette is manufactured in-house in our own pyrolysis retort units. Owning the carbonisation step gives us direct control over raw material, temperature, residence time and yield, the variables that decide fixed carbon, ash and burn quality.

1. **Biomass sourcing**
   Selected wood and agri residues
2. **Pyrolysis retort**
   Controlled, low-oxygen carbonisation
3. **Milling & blending**
   Fine carbon mixed with binder
4. **Briquetting**
   Pressed to shape, density, size
5. **Drying & packing**
   Quality-checked, export ready

CIRCULAR BY-PRODUCTS

Wood vinegar is captured and drummed at source.

WHY BRIQUETTES

Advantages that you can measure

Uniform quality
Identical shape, size and density in every piece, with +/-1-2 mm tolerance.

High heat output
GCV of 6,800-7,800 kcal/kg for fast, powerful, efficient heating.

Long, steady burn
Stable heat for 60-240+ minutes depending on size and application.

Low smoke & odour
Minimal smoke after ignition and a neutral aroma. Ideal for cooking and dining.

Low ash, no sparking
Residual ash of just 2-8% with none to minimal sparking. Easy clean-up.

Strong & durable
Drop resistance of 95%+ and durability of 90-98% mean less breakage in transit.

Eco-conscious
Made from renewable biomass residues through a controlled pyrolysis process.

Made to order
Custom shapes, dimensions and weights to suit your customer requirement.

OUR RANGE

Three shapes.

One standard of excellence.

CHAARGOLD
Crafting Carbon Perfection

Custom dimensions available on request

CENTRAL-BORE | UNIFORM

BRIQUETTES

Hexagonal

Designed for consistent burning and high heat output. A strong, uniform hexagonal structure with efficient airflow through the central hole delivers a steady, long-lasting burn with low smoke and minimal residue.

Uniform | High Heat | Long-Lasting | Efficient

KEY FEATURES

- Uniform shape, even stacking
- High heat output & efficiency
- Airflow through central bore
- Low smoke, low ash

BEST FOR

- BBQ & grilling
- Heating
- Industrial applications
- Restaurants & catering

BRIQUETTES

Pillow

Crafted for quick ignition, steady heat and a smooth, consistent burn. The compact pillow shape offers excellent handling and efficient combustion with low smoke and minimal residue.

Quick Ignition | Steady Heat | Clean Burn | Easy Handling

KEY FEATURES

- Faster ignition, easy handling
- Steady, even burn duration
- Clean burn, minimal residue
- Compact, efficient combustion

BEST FOR

- BBQ & grilling
- Restaurants & catering
- Premium experiences
- Hospitality

QUICK LIGHT | EASY HANDLING

MAX AIRFLOW | LONG BURN

BRIQUETTES

Honeycomb

Engineered with a unique honeycomb structure for excellent airflow, efficient combustion and consistent heat. Its robust form provides a steady, long-lasting burn with minimal smoke and residue.

Efficient | Long-Lasting | Clean Burning | Consistent Heat

KEY FEATURES

- Engineered for maximum airflow
- Superior heat & longer burn
- Robust, durable form
- Efficient & eco-friendly

BEST FOR

- Premium applications
- Grilling
- Commercial kitchens
- Industrial use

TECHNICAL DATA

Typical specifications

CHEMICAL	
Moisture	3–8%
Ash	7–12%
Volatile matter	10–20%
Fixed carbon	70–79%
GCV	6,800–7,800 kcal/kg
Sulphur	<0.1–0.5%
Chlorine	<0.05–0.2%
Total carbon	75–90%
Heavy metals	Within limits*
PAHs	Within limits*

PHYSICAL	
Density	0.8–1.2 g/cm³
Compressive strength	≥2–5 MPa
Drop resistance	≥95% intact
Abrasion / durability	≥90–98%
Dimensions	Per customer
Weight per piece	Per size / customer
Size tolerance	±1–2 mm

MADE TO YOUR SPEC
Custom shape, size and density to your requirement.

BURNING PERFORMANCE	
Ignition time	1–10 min
Burning duration	60–240+ min
Burn rate	~3–8 g/min
Max temperature	~500–700°C
Operating temp.	~450–650°C
Residual ash	2–8%
Smoke	Minimal after ignition
Odour	Minimal / neutral
Sparking	None to minimal
Heat output	Stable & uniform

*Typical values for charcoal briquettes. * Within applicable regulatory / customer limits, where required. Values depend on and may vary with storage, usage, raw material, carbonisation conditions, binder formulation, briquette size, density and other parameters.*

LEADERSHIP

Prem Raj

FOUNDER & CHIEF TECHNOLOGY OFFICER

Prem Raj is the Founder and Chief Technology Officer of CHAARGOLD, bringing over 15 years of experience in sustainable energy, biomass conversion and carbon solutions. An engineer, innovator, patent holder and passionate agriculturist, he combines technical expertise with practical industry knowledge to develop advanced pyrolysis technologies and high-performance carbon products.

With global exposure across diverse markets, he is also a successful hotelier and brand-builder, driven by a vision to create sustainable businesses that deliver lasting value for customers, communities and the environment.

> *Innovation is not just about creating new technologies; it is about transforming challenges into sustainable opportunities that create lasting value for people and the planet.*
> — Prem Raj
